

Macleod Industries Australia

PRODUCT: EC-101 Degreaser is formulated to remove body oils, fats, sun tan lotions, etc., from the walls and floors of a swimming pool and is an integral part of the preparations procedures prior to repainting.

EC101, like all of Macleod's products, is manufactured using the highest quality raw materials available.

AREAS OF USE:

- Pathways and walkways surrounding pools.
- Degreasing of pool interiors prior to painting.
- General cleaning of floors and walls
- Heavy use degreasing of machinery and engines
- Cleaning of vinyl flooring and upholstery.
- Effective cleaning of kitchen areas and equipment.
- Cleaning of bathroom areas.
- Can be used in conjunction with steam and/or pressure cleaners.

CONTENTS: Environmentally friendly. Contains no acids and is non caustic.

RATES OF USE: Supplied as a concentrate and is normally diluted for use at a rate of:
1:10 for swimming pool preparation/cleaning
1:10 for heavily soiled floors or other hard areas
Between 1:30 to 1:50 lightly soiled areas.

In some cases, EC-101 may be used undiluted or in an only marginally diluted form. (Degreasing of engines, soaking of oily machinery)

CONTAINER SIZES: Supplied in 5lt and 25lt containers.

For further information and advice on application, refer to other data sheets or contact us directly.
