FOR A BETTER WORLD

# Cleaner, safer, more hygienic Aquatic Centres

Aquatic Centres face unique cleaning and maintenance issues. Large expanses of tiled areas, metal surfaces and public facilities are subject to heavy traffic, leading to the accumulation of layers of grease and chemical deposits over time. Removing this staining and build-up requires powerful chemical cleaning systems that do not contain, create or leave hazardous or toxic residue to harm workers or aquatic centre visitors.

Envirofluid's range of cleaning products have been specially designed for Aquatic Centres to:

- Achieve effective, deep cleaning
- Provide safer alternatives to hazardous cleaning chemicals
- Create a sanitised and germ free environment
- Remove unpleasant smells
- Be easy to use for deep cleaning and regular maintenance
- Provide a cost effective solution

Envirofluid offers safer and more effective alternatives for a wide range of cleaning applications including:

- Poolside tiles
- Change rooms
- Floors
- Shower cubicles
- Toilets and urinals
- Basins
- Metal Surfaces
- Odour removal

## Welcome to the Envirofluid Range

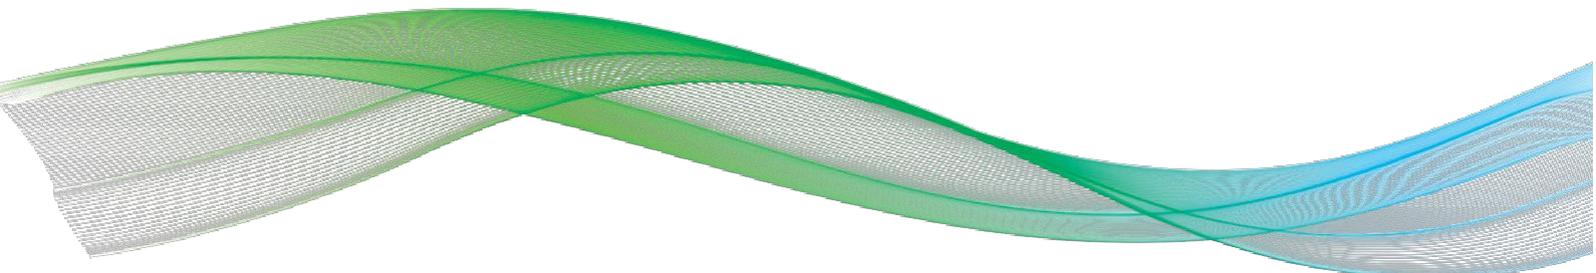

**WORKSAFE & ECO-FRIENDLY  
CLEANERS, DEHGREASERS &  
INDUSTRIAL CHEMICALS**

**SAFER SUBSTITUTES FOR  
TOXIC & DANGEROUS  
WORKPLACE SOLVENTS**

**POWERFUL PROFESSIONAL  
PRODUCTS FOR SPECIALIST  
APPLICATIONS**

# Powerful Products for Every Application

## TILE CLEANING

Remove layers of build-up, stains and discolouration with our highly effective tile cleaning system for Aquatic Centres. Poolside, shower and change room tiles are restored and maintained to their original look and non-slip performance.

Turn back the clock on worn out tiled surfaces with ActiveEco Restore. This powerful and heavy duty formulation deeply penetrates surface build-up and embedded stains, revealing 'as new' looking tiles.

ActiveEco Rejuvenator is designed for regular use, to maintain the look and performance of tiles and other hard surfaces. This versatile non-detergent cleaner will not damage tiles, glazed surfaces, glass or natural stone and can also be used to clean basins, shower cubicles and toilet partitions.

To optimise the performance of ActiveEco Restore and ActiveEco Rejuvenator, we have developed an innovative range of cleaning pads to be used with all scrubber-driers and single disc machines. ActiveEco Pads are tear resistant and specially constructed to achieve a deep clean and leave no residue or chemical build-up. Each set of pads cleans up to 10,000m<sup>2</sup>.

For stubborn stain removal, and daily clean-ups of spills and soiling on tiled surfaces, ActiveEco ActiPlus is an effective cleaner and degreaser. This high-tech and heavy duty formulation makes easy work of tough stains.

## METAL CLEANING

Stains, rust, mineral salt deposits, grease and corrosion on metal surfaces are no match for ActiveEco ActiRevenge. This heavy duty metal cleaner is specially formulated for stainless steel and aluminium surfaces in industrial, outdoor and commercial environments.

ActiveEco ActiRevenge removes watermarks and finger smudges, and conceals surface scratches. It chemically brightens the stainless steel and aluminium surfaces to a 'like new' state and leaves a non-oily surface which does not attract dust. Once applied, ActiveEco ActiRevenge forms a protective coating which repels water, dirt and chemical damage which helps maintain the just cleaned finish longer.

## CHANGE ROOM DISINFECTION

Keep change rooms germ and odour free with triple7 Aquasmart. This powerful and highly effective disinfectant can be used to sanitise toilets, basins and urinals, mop floors, and to keep on top of spills and soiling during the day.

triple7 Aquasmart's chlorine free formulation is odourless, non-hazardous and is a safe and effective choice to protect employees and members of the public.

## ODOUR CONTROL

Eliminate unpleasant odours at the source with triple7 Odour Control. This powerful cleaner and odour neutraliser is a high-tech, super concentrated formula that will keep toilets, bathrooms and change rooms clean, fresh and inviting. Unlike traditional air fresheners triple7 Odour Control does not use toxic chemicals to mask odours but works at the molecular level to remove and neutralise odour causing grime and gases.

Free from toxic and hazardous ingredients, triple7 Odour Control can be safely used as both a surface cleaner to remove all traces of unpleasant odours from toilets, urinals and floors, and misting the product into the air to keep environments fresh and pleasant throughout the day.

# Featured Products

## ActiveEco Restore

### TILE RESTORATION

- Heavy duty deep restoration for tiles and floor surfaces
- Powerful cleaning agents penetrate deeply to remove surface residue build-up and embedded stains
- Restores tiles to their original look and non-slip performance
- Effective grout restorer
- No chemical residue

## ActiveEco Rejuvenator

### TILE MAINTENANCE

- Designed for regular use
- Non-detergent hard surface maintenance cleaner
- Won't cause chemical build-up or damage hard surfaces
- Will not damage tiles, glazed, glass or natural stone surfaces
- Odourless
- Use in conjunction with ActiveEco Restore to create a periodic deep cleaning system to keep tiles looking brand new

## ActiveEco Pads

### FOR OPTIMAL CLEANING RESULTS

- Optimise the performance of ActiveEco Restore and ActiveEco Rejuvenator
- Innovative combinations of materials with profiled structure are crucial for deep cleaning
- Material stays tear resistant even when used with structured tiles
- Can be used in conjunction with all scrubber-driers and single disc machines
- Reduced drying times
- With each set of pads, up to 10,000m<sup>2</sup> can be cleaned

## ActiveEco ActiRevenge

### METAL SURFACE CLEANER

- Radical cleaning strength
- Removes stains, oxidising, rust, mineral salt deposits, grease and corrosion
- Chemically brightens stainless steel and aluminium surfaces
- Repels water, soiling, chemical attack and adhesion.
- Highly concentrated for economical dilution ratios

## ActiveEco ActiPlus

### SURFACE STAIN REMOVAL

- Removal of stubborn staining and grease
- Effective on a wide range of hard surfaces
- High-tech speciality penetrating agents
- Ultra concentrated formulation
- Low Odour
- Food Friendly

## Triple7 Aquasmart

### CHLORINE FREE DISINFECTANT

- Powerful disinfectant and sanitiser
- Chlorine free
- Safe and effective surface cleaning and purifying
- Effective over a wide range of pH and temperature variations
- Non-hazardous
- Odourless

## Triple7 Odour Control

### ODOUR NEUTRALISER

- High-Tech, super concentrate cleaner and odour neutraliser
- Destroys odours at the source
- No toxic or Dangerous ingredients
- Derived from renewable resources
- Multi-purpose – reduce inventory requirements
